PROFESSIONAL SUMMARY:

- 6.5+ years of experience building scalable web applications with React.js(V19.1) and TypeScript.
- Proficient in HTML, CSS, JavaScript, React.js, React Hooks, Functional components, Redux, Redux-Saga, TypeScript and Tailwind CSS.
- Demonstrated expertise in designing responsive web applications.
- Strong exposure to project management tools like Azure DevOps, Jira and VersionOne.
- Experienced in version control with Git, Azure DevOps[repos].
- Skilled in handling GitHub repositories and leveraging its various features.
- Expertise in creating and maintaining scalable front-end applications.
- Proficient in implementing and optimizing web accessibility standards.
- Strong problem-solving and debugging skills, with a keen eye for detail.
- Collaborated with cross-functional teams to develop and deploy high-quality software solutions.
- Knowledgeable in integrating third-party APIs and services into web applications.
- Strong background in Agile methodologies, ensuring efficient and timely project delivery.
- Demonstrated ability to mentor junior developers and conduct code reviews to maintain code quality.
- Experience with testing frameworks such as Cypress, Jest and React Testing Library.
- Skilled in implementing best performance practices like lazy loading, code splitting, and optimizing asset loading.
- Proficient in enhancing application performance using techniques such as memorization and use of React useMemo, useCallback hooks and React memo.
- Adept at reducing initial load time and improving runtime performance by leveraging techniques such as tree shaking and dynamic imports.

EDUCATIONAL QUALIFICATION:

- Bachelor of Technology, KSRM College of Engineering, May2019 (CGPA: 7.56).
- Intermediate, Narayana Junior College, March 2015 (Percentage: 87%).
- Secondary School Certificate (SSC), BVM High School, March 2013 (CGPA: 9.7).

TECHNICAL SKILLS:

- HTML/HTML5
- CSS/CSS3, SASS, Styled Components, Tailwind Css, Bootstrap, Reactstrap
- JavaScript (ES-6)
- React Js (Functional Compo.), React Hooks, Typescript
- Next Js
- React testing library, Cypress
- Redux, Redux-Saga, Redux Toolkit, RTK query
- TanStack Query, Tanstack Table
- GitHub, Azure DevOps (Boards & Repos), AWS, Bit-bucket

EXPERIENCE DETAILS:

- Working as a Technical lead for **Evoke Technologies Pvt Ltd**, Hyderabad since Mar 2022 to till date.
- Worked as a Senior Software analyst for **GetOnGrey Pvt Ltd**, Hyderabad from October 2019 to Mar 2022.

PROJECTS:

PROJECT 6: CSC DBS - DomainSec

Client: CSC Global

Duration: April 2024 – Present

Project: DomainSec

Technologies: HTML, CSS, JavaScript, React.js, React Hooks, Azure, Redux, Redux-Saga, AmCharts 5, TypeScript, Cypress, React-Bootstrap, Axios, Bit-bucket.

Description:

Domain Security is a dashboard provided to customers who have registered domains with CSC. It offers a visual representation of CSC's security features. Using AmCharts 5, the data is displayed in pictorial charts, allowing users to check statistics such as new registrations, dropped registrations, re-registrations, domain security, brand protection, anti-fraud measures, and more.

Roles & Responsibilities:

- Developed dynamic dashboards with interactive data visualizations using AmCharts 5.
- Optimized performance using advanced techniques like component memorization and lazy loading.
- Manage CI/CD pipelines with **Azure DevOps** for automated deployments.
- Monitor application performance using **Azure Application Insights**.
- Engaged regularly with stakeholders to ensure alignment, using Agile methodologies to report progress and adapt to evolving requirements.

Migration & Modernization (Best Version):

- Successfully migrated a large legacy React application from Create React App (react-scripts) to Vite, significantly improving build speed, developer experience, and overall performance.

- Upgraded all project dependencies to the latest stable versions with zero regressions, ensuring compatibility, stability, and long-term maintainability.
- Received strong appreciation and positive feedback from the client for delivering a smooth, error-free migration ahead of expectations.
- Identified that react-bootstrap-table-next was no longer maintained and caused compatibility issues during the upgrade.
- Removed the deprecated table library and led the migration to a licensed KendoReact Grid, designing and implementing a reusable common table component used across the application.
- Improved consistency, scalability, accessibility, and performance by standardizing table behavior (sorting, pagination, selection, and styling) through the shared KendoReact component.

PROJECT 5: KAEBOX

Client: Kaebox

Duration: July 2024 – Present

Project: Kaebox

Technologies: HTML, CSS, JavaScript, React.js, React Hooks, TypeScript, Axios, Tailwind Css, Bitbucket, Google Maps, Google console APIs, Azure.

Description:

Kaebox is an app-based platform that connects users with couriers from ride-sharing drivers, offering fast and flexible local delivery services. Partnering with major carriers like UPS, FedEx, and DHL, Kaebox facilitates on-demand pickups and deliveries for packages and documents, providing couriers with multiple transport modes for eco-friendly deliveries.

Roles & Responsibilities:

- Analyzed and implemented business and technical requirements for Kaebox's web platform.
- Developed responsive, high-performance web applications leveraging React Hooks and advanced optimization techniques.
- Integrated Google Maps API for real-time tracking and location-based services.
- Develop and deploy frontend applications using **Azure devops Services**.
- Ensured seamless collaboration across cross-functional teams using Agile methodologies.
- Employed best practices in code quality, including effective use of TypeScript for type safety and maintainability.

PROJECT 4: Client Administration Application

Client: Medical Solutions

Duration: Dec 2022 – April 2024

Project: Client Administration Application

Technologies: HTML, CSS, JavaScript, React.js, React Hooks, Context API, TypeScript, Reactstrap, Tanstack Query, Tanstack Table, Azure.

Description:

The Client Administration Application for Medical Solutions facilitates seamless interaction between clients and traveling nurses/staff, ensuring a perfect fit for clinical, community, and cultural needs. As part of the healthcare staffing and recruiting industry, this application empowers Client Admins with access to the Client Portal Travel Application, enabling them to manage user profiles efficiently.

Roles & Responsibilities:

- Developed robust features to support Medical Solutions' staffing requirements, focusing on client-specific needs for Hospital Maintenance and User Management functionalities.
- Applied optimizations across components to improve load time and runtime efficiency, enhancing user experience.
- Secure API communication using **Azure API Management** and **CORS policies**.
- Monitor application performance using **Azure Application Insights**.
- Led daily stand-ups and sprints, ensuring timely delivery and collaboration.

PROJECT 3: Client Portal Travel

Client: Medical Solutions

Duration: Dec 2021 – April 2024

Project: Client Portal Travel

Technologies: HTML, CSS, JavaScript, React.js, React Hooks, Context API, TypeScript, SignalR, Reactstrap, Tanstack query, Tanstack Table, Azure.

Description:

The Client Portal Travel project at Medical Solutions streamlines the process for clients to find suitable traveling nurses and staff. With features like Dashboard, User Maintenance, Job Posting, and Candidate Management, it offers a comprehensive solution for healthcare staffing needs.

Roles & Responsibilities:

- Developed and implemented critical features such as Dashboard, Job Posting, and Candidate Management, enabling comprehensive staffing solutions.
- Provided performance optimization solutions.
- Secure API communication using **Azure API Management** and **CORS policies**.
- Monitor application performance using **Azure Application Insights**.
- Maintained consistent, proactive client communication and followed Agile methodologies to meet project goals and deadlines.

PROJECT 2: CMS (Conditional Monitoring System)

Client: UGL

Duration: Oct 2020 – Dec 2021

Project: CMS

Technologies: HTML, CSS, JavaScript, React.js, React Hooks, Redux, Redux-Saga, Fluent UI, TypeScript, SignalR.

Description:

The CMS project for UGL is a vital system for monitoring train conditions in the South Wales region of Australia. It empowers Help Desk staff with real-time and historical data insights, facilitating informed decision-making regarding train maintenance and operations.

Roles & Responsibilities:

- Implemented real-time monitoring features, including AEE Monitor and Condition Report, to support informed decision-making for train maintenance.
- Enhanced application stability and performance with techniques such as caching and efficient state management using Redux and Redux-Saga.
- Partnered with stakeholders to align project objectives, using Agile processes to provide regular updates and feedback.

PROJECT 1: Sleep Country

Client: Sleep Country

Duration: Oct 2019 – Sep 2020

Project: Sleep Country

Technologies: HTML, CSS, JavaScript, React.js, React Hooks, Redux, Redux-Saga, TypeScript

Description:

Sleep Country, a leading mattress retailer, entrusted us with the development of its web application. I contributed to implementing critical features like the Products Listing Page and Product Details Page, enhancing the online shopping experience for customers.

Roles & Responsibilities:

- Developed critical components for Sleep Country's online store, including Product Listing and Product Details Pages, optimizing for performance and responsiveness.
- Ensured the application delivered a visually appealing, responsive, and easy-to-navigate interface to enhance the shopping experience.
- Coordinated with clients and team members within Agile frameworks, supporting efficient project management and timely feature releases.

DECLARATION:

I hereby certify that the information provided in this resume is true and accurate to the best of my knowledge.

Place: Hyderabad

Date: 14/12/2025

D. Rajasekhar Reddy
